Supply Chain Security – Certification for STP

Programme Aim

This programme is specifically designed to provide comprehensive training on a broad spectrum of facility security domains embracing the pivotal risk assessment and management in line with Singapore Customs Secure Trade Partnership Certification process. It will be particularly appropriate and valuable for exporting and importing oriented manufacturing organizations including their intermediary organizations in the supply chain (logistics, freight forwarding, warehousing). By sending their key personnel's for this training, they will essentially be able to conduct their own risk assessment and report framework for submission to Singapore Customs for validation and endorsement.

The significance of Singapore Customs Secure Trade Partnership initiative is to galvanize the collective and cohesive efforts of public and private partnership in the fight against terrorism consistent with major global trading nations. In all, this initiative aimed to strengthen all the strategic nodes in the holistic supply chain road map.
